

VostroNet Build-to-Rent Internet

Tailored Network Solution

VostroNet

Smarter Internet

Deliver fast fibre internet to your build-to-rent development with VostroNet's tailored network offering

Connected Living

Our residential solution utilises 10 Gbps fibre infrastructure and our sophisticated Wi-Fi software to provide a seamless user experience that is tailored to a multi-dwelling unit environment. VostroNet's Q2 software allows residents to be onboarded within seconds of their arrival.

Fast Wi-Fi Mesh lets residents connect wherever they are in the building: so they can skype their family or stream 4K video while in the gym, the pool or their apartment.

Wireless internet with our own dedicated 10 Gbps fibre to the building.

VostroNet Build-to-Rent Network

- **Significant cost savings**
Centrally procured internet allows for significant savings through wholesale prices.
- **Seamless Connection**
Wireless internet with our own dedicated 10 Gbps fibre to the building.
- **Customisable captive portal and landing page**
Branding customised for easy onboarding and brand enhancement.
- **24/7 management, monitoring and support**
We operate 24/7 network operations and helpdesk support, keeping residents online all-the-time.
- **Security as a priority**
Our network incorporates private vLans, enterprise-level encryption and DNS protection to ensure residents are protected.
- **Analytics**
VostroNet's platform provides useful analytics to enhance the management of the building.

VostroNet offers two solutions to the developers in the build-to-rent sector:

Build-to-Rent Solution

- Building-wide fibre internet with Wi-Fi mesh that is perfect for easy coming-and-going of residents and offers significant monthly cost savings full stop.
- High-speed Wi-Fi connections everywhere: in rooms and common areas (reception, pool, rooftop, gym) to support residents' connected living.
- The solution utilises 10 Gbps fibre infrastructure and our sophisticated Wi-Fi software to provide a seamless user experience that is tailored to build-to-rent environments.

Residential Fibre-to-the-Premises Solution

- Standard design that provides for fast internet to each apartment.
- Residential Fibre-to-the-Premises Solution provides fibre connections to each apartment, connecting to VostroNet's fast fibre network.
- Wholesale-only network; retailers contract with end-users who receive affordable, high-speed plans.

The VostroNet Difference

We lead the industry in software-defined networks, harnessing software to optimise performance and user experience. Our entire network is monitored and maintained in real-time through our industry-leading Q2 Software Platform™, proactively resolving issues and keeping our customers happy.

Key Benefits Summary

Our Own Fibre

- ▶ VostroNet operates and maintains the infrastructure from the data centre to the in-room wireless routers, and everything in between
- ▶ 10 Gbps connection to developments
- ▶ Network monitored 24/7 to ensure residents remain online
- ▶ Residents can connect to the network from the moment they walk through the door

Connected Living

- ▶ Sophisticated Wi-Fi software provides a seamless user experience around the building/precinct
- ▶ Enhance the management of these wireless environments with a customisable captive portal, plus location analytics

Tailored Solution

- ▶ Perfect network solution for the easy coming-and-going of residents
- ▶ 10 Gbps fibre infrastructure and our sophisticated Wi-Fi software to provide a seamless user experience
- ▶ Significant cost savings for the operator and residents

Smarter Technology

- ▶ Useful analytics to enhance the management of the building
 - ▶ Branding customised for easy onboarding and brand enhancement
 - ▶ VostroNet's secure network uses private vLans, enterprise-level encryption and DNS protection to ensure residents are protected online
