VostroNet

VostroNet provides high-speed internet to hotels, resorts and short-stay accommodation. We are an end-to-end provider, connecting your guests to the internet via our Q2 Software Platform™

Key Features

Seamless connection

Wireless internet with our own dedicated 10 Gbps fibre to the building.

Customised captive portal and landing page

Apply your brand by customising the complete user experience, including login screens, sign-up and simplified splash screen.

Integrated with PMS

Full traffic management with rate limiting and usage control; managed via a dedicated portal and advanced reporting.

Support for all users

Easy-to-use user self-registration with 24x7 white-labelled support available for guests. Easily accessible via Chat, Email or Phone.

The VostroNet Difference

We lead the industry in software-defined networks, harnessing software to optimise performance and user experience. Our entire network is monitored and maintained in real-time through our industry-leading Q2 Software Platform™, proactively resolving issues and keeping our customers happy.
